

Industry 4.0 Revisited

Following the success of our first conference on the digitisation of manufacturing back in 2016, we're revisiting it with an impressive range of new speakers with more to be added.

To register as a delegate, please email stevegerry@dsl.pipex.com ASAP to reserve your place.

Future Inn, Plymouth 1st July

12 noon buffet lunch and exhibition | 1pm presentations commence | 4:30pm finish

Catherine Harris

Managing Director of Algram Group Ltd, part of the Olympus Group of Companies

The event will be chaired by Catherine who is Chairman of the PMG.

Exhibitors include:

EuroTech Group
Fairford Electronics
Oakmount Controls
One Polygon
Siemens Digital Industries
University of Plymouth

If you want to exhibit too, please get in touch.

Brian Holliday

Managing Director, Siemens plc

Digital Industries

Brian Holliday is Managing Director for Siemens Digital Factory which serves the manufacturing and infrastructure sectors. He is a member of the Executive Management Board of Siemens plc and Chairman of Siemens Industry Software UK.

Siemens Digital Industries is an innovation and technology leader in industrial automation and digitalization. Brian will explain that by working in close cooperation with their partners and customers, they are a driving force for digital transformation in the discrete and process industries.

Carsten Roettchen

Managing Director International Production, Rittal

The digitalisation and networking of production processes within Rittal

Carsten's primary task in his role is to oversee the realignment of Rittal's global manufacturing operations. Rittal is building a new, ultra-modern plant in Haiger, Germany, that will manufacture compact enclosures and serve as a model example for all the global player's sites around the world. In this model, Industry 4.0 structures form the basis of highly efficient production, logistics and communication processes: "The digitalisation and networking of production processes will play a key role in boosting the competitiveness of Rittal and making the company fit for the future," said Dr Karl-Ulrich Köhler, CEO of the international family-owned enterprise.

Andrew Gill

Industrial Associate, Institute for Manufacturing (IfM), Education and Consultancy Services, University of Cambridge.

Digital Manufacturing on a Shoestring?
How can SME manufacturers benefit from digitalisation without excessive cost and risk?

Andrew will explain how researchers at the University of Cambridge and University of Nottingham are collaborating with SME manufacturers to explore and develop low-cost digital manufacturing solutions to meet small-scale manufacturing needs.

We also want to showcase what PMG members are doing or planning to do locally in their sites and premises. What are you doing, for example, in relation to the digitisation of production; additive manufacturing or 3-D printing; the servitisation of your business; big data management etc?

Would you like to join us and present on any of these topics? Large scale or small-scale.

If so, contact stevegerry@dsl.pipex.com
